### MOTORSPORT / OFF-ROAD SYSTEM

Description	Components	What is Datatag?
The theft of off road motorsport vehicles, such as race cars, motorcycles, karts, is running at an alarmingly high level and, worse still, is accelerating. To any thief, your race vehicle is potentially a 32 part catalogue from which they can make a lot of money. Professional thieves can literally load your vehicle into the back of a van so fast that no one will notice. They can also strip your machine to pieces in less than 30 minutes.		
Thieves can easily remove your vehicles engine and frame numbers, and they are aware that the chances of the Police being able to identify the machine afterwards are virtually nil.		
This system is ideal for:		
<ul style="list-style-type: none"><li>• Race and Track Cars</li><li>• Race and Track Motorcycles</li><li>• Trail Bikes</li><li>• Moto Cross Bikes</li><li>• Speedway Bikes</li><li>• Go-Karts</li></ul>		
There are no annual fees when fitting Datatag and when you come to sell, you'll find that the Datatag registration can be transferred to the new owner.

- In respect of **insured property** left unattended, unless kept in a locked garage or workshop of **standard construction**, must be secured to the vehicle in which it is kept or by means of a closed shackle padlock and stout chain and, if the **trailer** is enclosed, the door to the **trailer** must be secured by means of a closed shackle padlock.
- Trailer(s)** must be immobilised by means of a wheel clamp and towing lock when left unattended.  
Note: **We** accept that where a brief stop for fuel at a service station is concerned it is not practical to attach the wheel clamp whilst in a fuel filling area, but **ANY** other time and especially where the **trailer** is out of sight the wheel clamp and towing lock must be attached / operative. (It is staggering just how opportunist thieves can be).
- Where the **insured property** is kept within a **motor vehicle** during the course of travelling to / from a race meeting or other circuit activity or where staying overnight the vehicle must be alarmed with a Thatcham approved alarm system and all the vehicles security devices are to be put into full and effective operation.
- Insured property** not in use and or being stored temporarily at the premises or any representatives must be of **standard construction** (see "Definitions").
- All protections at the storage location(s) workshop or garage, including alarms must be put into full and effective use when the premises are left unattended.

Any occurrence which may result in a claim being made under this insurance must be reported to **MORIS** as soon as possible, ideally within 7 days. This can be done by emailing or calling **us** or by going directly to **our** online claim notification form: <https://motorsport.moris.co.uk/claims.asp>

Full details of the loss and substantiation of the claim must follow within thirty days.

All practical steps must be taken to minimise the loss or recover the missing property.

Information, evidence and assistance as required together with (if required) a statutory declaration of the truth of the claim and of any matters connected with it are to be at **your** own expense. **You** must provide all information and assistance to insurers or their representatives and must not negotiate, pay, settle, admit or repudiate any claim without the written consent from insurers.

**You** are responsible for costs incurred through the transportation of the damage and insured goods, parts and/ or chassis, engine and transmission to the United Kingdom unless **we** request otherwise.

In the event of **theft** or **malicious damage**, immediate notice must be given to the police. Insurers require that **you** obtain a crime reference number.

In the event of an **accident on the road** involving collision by a third party **you** must obtain the third party's details being:

- (a) name of their insurance company
- (b) their vehicle registration
- (c) their address and phone number

## Trailer Security

By taking every possible precaution to protect **your trailer**, all will benefit by helping insurers to keep **your premiums** down, plus do **you** really want the hassle of losing **your trailer** and anything in it?.

**Trailer theft** is a big problem and it's getting worse! To a thief, an unsecured **trailer** is simply money on wheels that is just asking to be stolen.

There are steps **you** can take that will go some way to deter an opportunist thief since the vast majority of them are looking for an easy heist. If presented with an effective **theft** deterrent the thief will invariably move on to easier targets.

The two biggest enemies for a thief are:

- **time** and
- **noise**.

Anything **you** can do to slow a thief down and make them generate noise will improve **your** chances of keeping **your** property. Here are some simple steps **you** can take:

- Park **your trailer** where it is least visible to people passing by. If it's out of site, it's out of mind.
- Don't park **your trailer** with the front pointing towards the street/road / escape route.
- Remove one or all of the **trailer** wheels. Take the lug nuts too. Thieves frequently carry spares with them.
- Use a chain or cable to secure **your trailer** to some stationary solid object.

Obviously, **you** may not want to take the time to remove a wheel every time **you** park **your trailer** so the use of some sort of **trailer** security device is the answer. When you're on the road with **your trailer**, using a security device is the only answer. **Trailer** security devices fall into two basic categories.

1) Hitch locks

2) Wheel locks

Although hitch locks provide some measure of **theft** deterrence, thieves can defeat them reasonably easily and with very little noise.

Insurers recommend wheel locks because if thieves cannot move **your trailer** because one of the wheels is properly secured, it's going to be tough to steal **your trailer**. Remember....time....noise.

A wheel lock must automatically prevent removal of the wheel on which it is installed. Many wheel locks available today just clamp onto the wheel and are not designed to prevent wheel removal. Those type wheel locks are very easy to defeat.

**Helpful Tip:** Always install the wheel lock on the "driver's side" of **your trailer** because:

1. If potential thieves back their tow vehicle to **your trailer**, as they open the driver's door of the tow vehicle they will probably see the wheel lock and be put off.
2. Installing **your** wheel lock on the driver's side of the **trailer** helps remind **you** to remove the wheel lock before using **your trailer**.

- **Remember....time....noise.**
- **Secure it and keep it.**
- **Ignore it and lose it.**
- **Don't wait until it's too late.**
